SIMPLE CHATBOT

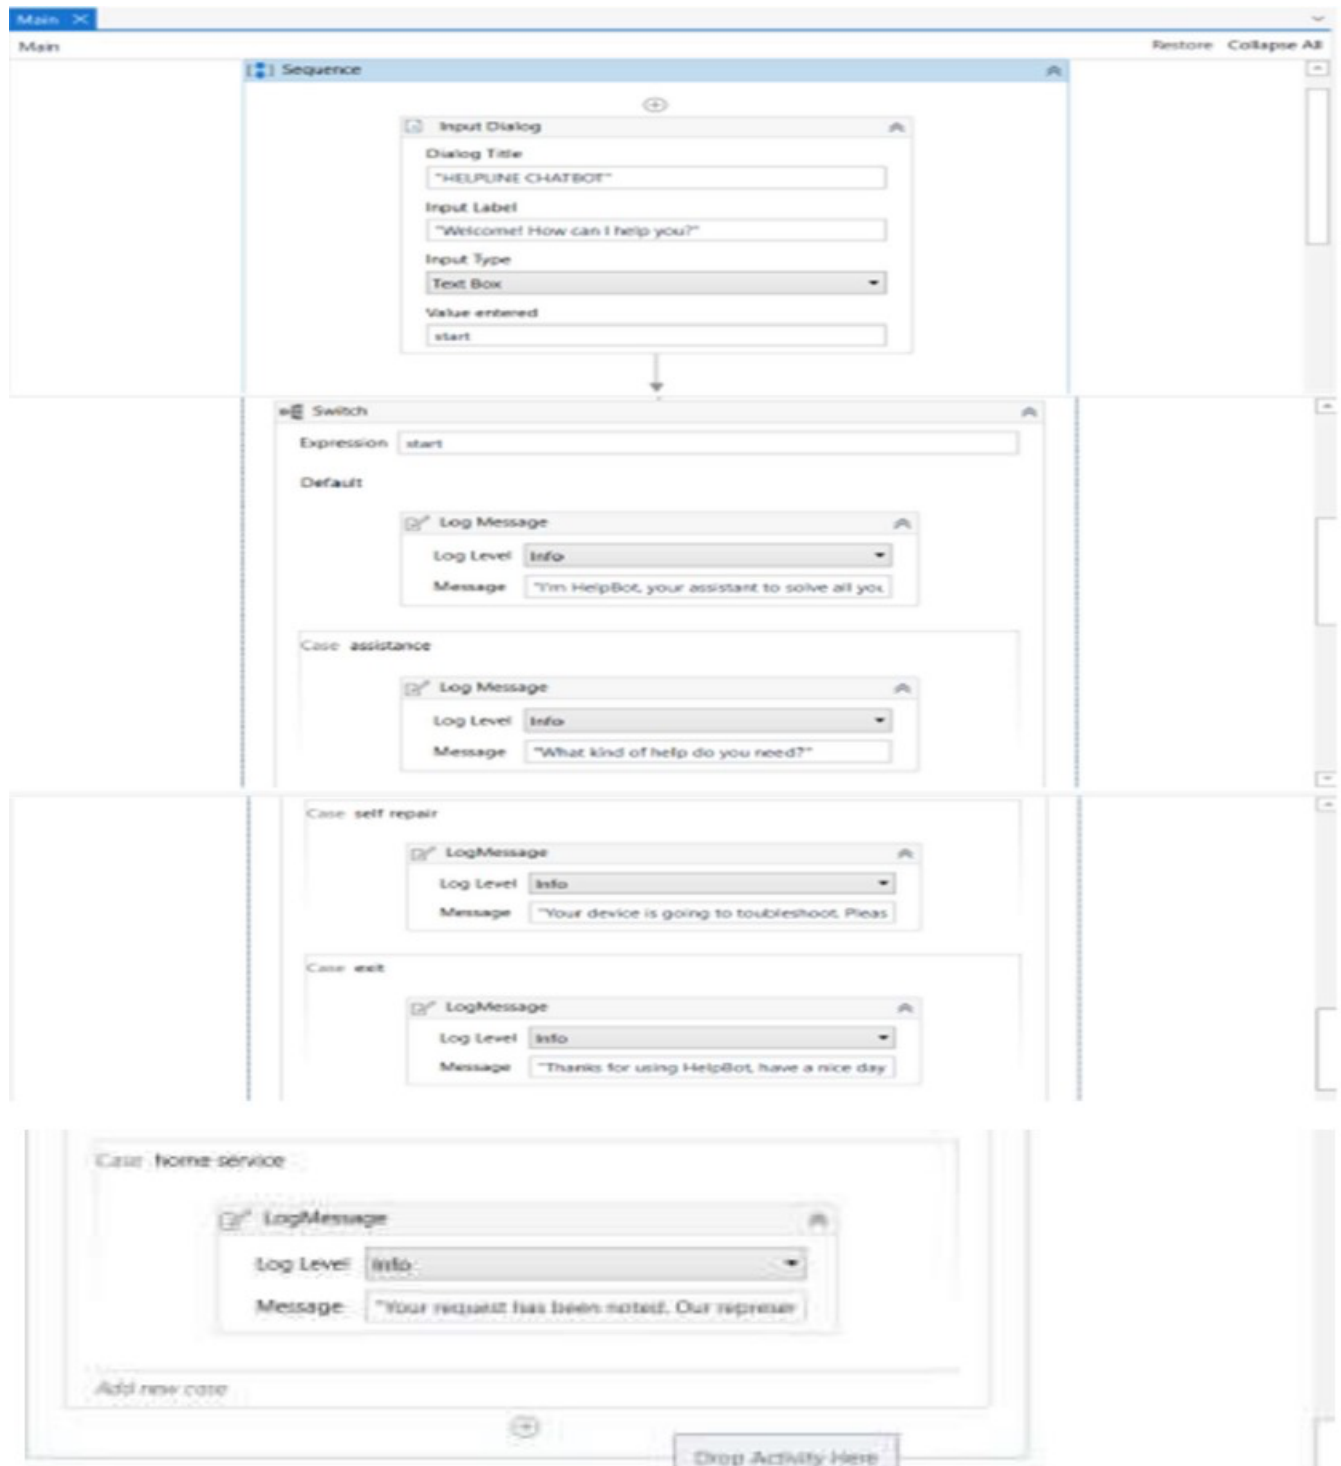

Aim

To create a chatbot using a UI path.

Algorithm

1. Open UI path studio, and open main workflow.
2. Search for input dialog drag and drop in sequence.
3. Enter the dialog as “welcome chatbot”, value as ‘welcome’.
4. Drag and drop the switch case under the input dialog.
5. Define the cases and the log message respectively.
6. Now, run the bot, check, and wait for the “run successful” in output windows.

Bot flow

Output Screenshot :

USER SAYS

COPY CURL

Hello
